This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

SUBJECT INDEX

In preparing this index considerable revision of the subject headings as suggested in the Booklist during the last six years has been found necessary. In this revision the probable main uses of the index—as a reference and buying list—have been the determining factors. Analytical work has been done wherever the material seemed likely to be useful to the average library.

With few exceptions forms of headings follow those in the *A. L. A. Catalog*. No cross references have been made that are given in it, or in the *Cumulative Book Index*, since there are few libraries that have not one or both of these for reference. A very few references not given in them have been included.

The April 1905 number has been indexed as if the paging had run continuously; that is, p. 3 is 35 and p. 10 is 42.

The index to children's books follows this.

The editor wishes to acknowledge her indebtedness to Mrs Harriet Price Sawyer for her assistance in this work and to the Wisconsin Library Commission for giving the time that she has spent on it.

CHILDREN'S BOOKS

Forms of heading in the main agree with the Carnegie Library of Pittsburgh's *Catalog of books in the children's department*, and no cross references have been made that are given here. A few headings have been included that are not subject headings, such as Poetry (for individual poets' collections) and adaptations of classics (Chaucer, Shakespeare, Spenser, etc.). No stories have been indexed except those that have been given a class number in the Booklist, and modern fairy tales.

Accidents
Gulick. Emergencies. 1909. 6:96.

SUBJECT INDEX

This supplement to the Subject Index published a year ago, which covered volumes 1–6 of the Booklist, follows the same plan. In general the headings are identical with those in the *A. L. A. Catalog*. Cross references have been omitted, except in a very few cases. Their inclusion seemed hardly necessary since there are few libraries which do not have the *A. L. A. Catalog* or *Cumulative Book Index* for reference.

The index to children's books follows this.

Accidents, Industrial
Campbell. Industrial accidents and their compensation. 1911. 7:323.
Eastman. Work-accidents and the law. 1910. 7:55.
Nearing. Social adjustment. 1911. 7:388.
Saeger. Social insurance. 1910. 7:116.
U. S. Labor bureau. Fatal accidents in coal mining [and] Employers' liability and workmen's compensation. 1910. 7:404.
Van Schaack, *ed.* Safeguards for the prevention of industrial accidents. 1910. 7:207.

Accounting
Gillette. Cost keeping and management engineering. 1909. 7:103.

Actors and acting
Eaton. At the New Theatre and others. 1910. 7:192.
Frohman. Memories of a manager. 1911. 7:419.
Hicks. Seymour Hicks: twenty-four years of an actor's life. 1911. 7:423.

Adams, James Capen
Hittell. Adventures of James Capen Adams. New ed. 1911. 7:453.

Advertising
Thayer. Astir; a publisher's life story. 1910. 7:21.
See also Library advertising.

Aerial navigation
See Aeroplanes; Balloons; Flying machines.

Aeroplanes
Brewer. Art of aviation. 1910. 7:95.
Petit. How to build an aeroplane. 1910. 7:113.

Afghanistan
Holdich. The gates of India. 1910. 7:61.
